

MIGUA

EXPANSION JOINT COVER SYSTEMS

ESTABLISHED 1920

Dubai Mall Extension

Dubai, UAE
MIGUTAN FP 155
MIGUTEC WP 255

YOUR NEEDS SET OUR BENCHMARK: **BEST EXPANSION JOINT COVERS FOR SUSTAINABLE CONSTRUCTION QUALITY.**

MIGUA, founded 1920 in Blankenburg/Harz (Germany), is Europe's leading expert in the design, manufacture and installation of expansion joint systems. MIGUA expansion joint systems serve to cover, close and seal expansion joints. Our products satisfy the most rigorous standards in quality and safety and are widely used in large-scale construction projects such as airports, train stations, industrial plants, park buildings, shopping centers and hospitals.

Worldwide, MIGUA is either active in international markets with own sales teams as in Germany, Poland and the MENA/India region, or is represented by independent, specialized companies in more than 60 countries.

Our product range consists of more than 650 different expansion joint systems and offers a maximum of technical know-how as well as on-time delivery to our customers.

In addition, our team of engineers designs individual solutions for the manifold demands of international large scale projects in close co-operation with architects, construction companies and owners to meet their specific demands.

Every day, our experienced teams do their utmost to ensure that our outstanding product quality and innovative approach make your building project successful. We are not satisfied until you are satisfied. Because our guiding principle is:

MIGUA – **you** first.

Visit us online: migua.ae

MIGUA OFFERS A COMPREHENSIVE PRODUCT PORTFOLIO OF **EXPANSION JOINT COVERS AND SYSTEMS** WITH OUTSTANDING FEATURES.

Our product range covers 5 application orientated product groups as detailed below. In addition to standard expansion joint covers our R&D engineers

provide highly sophisticated solutions for special or non-standard applications. MIGUA provides solutions for extraordinary challenges.

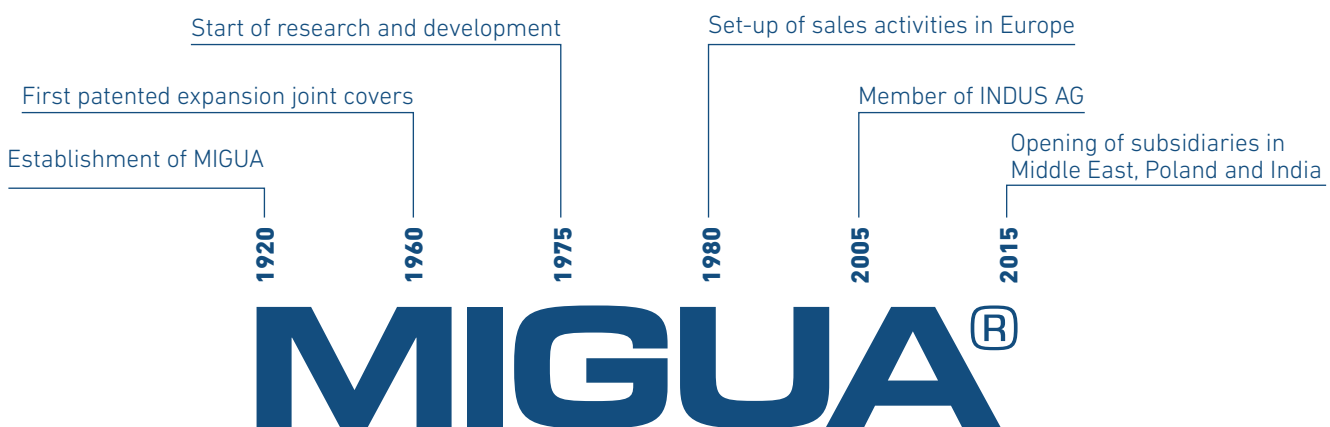

<p>MIGUtec</p> <hr/> <p>JOINT COVERS FOR EXPANSION JOINTS</p>	<ul style="list-style-type: none"> • reliable and proven product lines of expansion joint covers for most purposes in internal and external areas • for floors • for walls and ceilings • for fixing on concrete, in screed, plaster, but also finished surfaces • most of the inserts are interchangeable at any time
<p>MIGUtrans</p> <hr/> <p>FOR TRAFFICABLE SURFACES</p>	<ul style="list-style-type: none"> • all-metal expansion joint systems in shopping malls, railway stations, airports, exhibition halls, storage facilities, hospitals, etc. • to be used by fork lift trucks and pallet trucks • official test certificate available • hard wearing, maintenance-free, long lasting
<p>MIGUTAN</p> <hr/> <p>WATERTIGHT EXPANSION JOINT SOLUTIONS</p>	<ul style="list-style-type: none"> • for usage in car parks, multi-storey car parks, underground car parks, swimming pool areas, pedestrian bridges, etc. • guaranteed watertightness – official test certificate available • available for hygienic requirements in large kitchens, hospitals, sport venues, etc. • sealing on top surface, central insert replaceable at any time
<p>MIGUPREN</p> <hr/> <p>EXPANSION JOINT STRIPS TO SEAL JOINTS WITH THREE-DIMENSIONAL MOVEMENT</p>	<ul style="list-style-type: none"> • corrugated jointing system and sealing strips for flat roofs and covered areas such as underground car parks • excellent bonding • official test certificate on request; hot-bitumen resistant • large, multi-directional movement
<p>MIGUMAX</p> <hr/> <p>EARTHQUAKE-RESISTANT</p>	<ul style="list-style-type: none"> • designed for extremely high movements and large joint width • easy installation • all types of finishes • flexible use • heavy loads

BASED IN GERMANY – SUCCESSFUL ALL OVER THE WORLD

MADE IN GERMANY
WE SATISFY THE MOST
RIGOROUS STANDARDS
IN QUALITY AND
FUNCTIONALITY.

For us at MIGUA, quality primarily means ensuring optimum functionality and long service life. This is why MIGUA expansion joint covers are developed and manufactured in Germany – and examined in detail during extensive testing. Our many patents and inspection certificates verify this.

OUR SUCCESS STORY
DECADES OF EXPERIENCE
FOR OUR CUSTOMERS'
BENEFIT.

Nowadays, Migua is consequently pursuing the process of internationalization. We are aiming at sustainable growth, for the benefit of our customers and our members of staff. For the future, our target remains to accompany our customers with our competence and commitment in a partnership of equals.

OUR INNOVATIVE CAPACITY IS PATHBREAKING FOR THE ENTIRE INDUSTRY.

More than 650 proven Migua expansion joint covers have so far been developed to satisfy our customers' every demand. Moreover, as an efficient manufacturer, we are able to develop customised solutions for specific requirements – however ambitious they might be.

reddot award 2017 winner

INNOVATION OF PRODUCTS AND SERVICES

As the first manufacturer of expansion joints ever, MIGUA is granted the sought-after Red Dot Award. With the innovative wall joint cover named WSP, Migua created an outstanding design that the expert committee for the Red Dot Award Product Design 2017 has recognised with the internationally approved seal of quality. For us at Migua, this is an incentive to continue our efforts to offer our customers nothing less but the best in quality, functionality and innovative design.

AN EXTRACT OF OUR SATISFIED CUSTOMERS

As one of Europe's leading experts in the design, manufacture and installation of expansion joint systems, Migua is proud to serve many internationally well-known companies and to contribute to their success.

[INDUS]

MIGUA IS PART OF INDUS GROUP

As the leading specialist in the field of sustainable investment and growth in German small and medium-sized companies, INDUS primarily acquires owner-managed companies and helps their business grow over the long term. INDUS thus ensures in the process that these companies are able to retain their particular strength: Their identity as medium-sized companies.

HEALTH & SAFETY ONE OF THE CORNER- STONES TO OUR SUCCESS

Our employees' safety is the highest benchmark we have for optimising our processes. We therefore subject our production processes in particular to a process of continuous improvement. In doing so, we build on the fruitful interaction between the employers' liability insurance associations, workers' representatives, our employees and our executive board. Our purpose is to ensure the best long-term health and safety solution for the manufacture of MIGUA expansion joint covers.

WHAT WE'RE COMMITTED TO DOING

We are aware of our responsibility to our customers, business partners and employees. As a part of INDUS group, we are committed to a joint Code of Conduct that is characterised by responsibility and accountability, sincerity, loyalty and respect towards our fellow human beings and the environment. Our actions are governed by integrity. Observance of law and statute is a prime imperative for our company.

GASKET SERIES | FLOOR COVERS

Suitable for:

- Health Care
- Retail Outlets
- Educational Facilities (Schools, Universities, etc)
- Commercial (Mix-Used complex)
- Recreational Facilities

Designed for:

- Hygiene environment
- Wheeled equipment
- Minimum visual impact
- Internal and external application

100% WATERTIGHT MIGUTAN SYSTEM | FOR BITUMINOUS LAYER

Suitable for:

- Transport (Airports/Metros & Depots)
- Stadiums
- Parking Structures

Designed for:

- Structures with bituminous waterproofing layer
- 100% watertight requirement
- Internal and external use
- Large movement requirement
- Heavy wheeled equipment and high trafficable area

MIGUA FIRE BARRIER – **FOR ALL KINDS OF EXPANSION JOINTS**

Fire barriers are designed and installed together with the expansion joint cover. Each fire barrier is optimally adapted to the individual expansion joint setting. Therefore, knowing the exact joint width and in particular the calculative expected joint movement in expansion and compression (=x)-, lateral shear (=y)- as well as vertical displacement (=z)-direction is crucial. All fire barriers are approved for certain movement sizes only and may only be used within these limits.

Ropes for example are only approved up to a movement of max. 7.4% of the width in Europe, since they no longer expand after compression, which would make the fire protection insufficient. Many products have approvals but are not suitable for use with movement joints.

Therefore, the exact data of each movement joint have to be determined and the material has to live up to these specification.

We offer a solutions for every requirement. Take advantage of our experience. MIGUA gladly supports you with competent technical support to assist in choosing the right expansion joint cover and appropriate insulation design.

MIGUFIRE system has been tested at Underwriters Laboratories® for a two-hour rating. The system was fully pre-cycled for 50%, expansion and contraction capacity. It protects against the spread of fire through and expansion and/or seismic joint before and after movement. Complies with UL® 2079 and ASTM E1399.

Designed for:

- Fire stops within buildings, e.g. schools, hospitals, shopping malls, airports, railway stations, car parks, and commercial buildings
- Expansion joints ranging from 1" to 20"
- For floor and wall applications
- For joints with large movements up to +/- 50% (expansion and compression)
- For requirements concerning duration of protection of 120 minutes
- For requirements concerning certified material according to UL or ETA
- Approved for seismic movement

Product Features:

- Fire resistance of > = 120 Min.
- Accomodates dynamic movement
- Can be integrated with (nearly) all of our expansion joint systems
- Caulk-free application
- Easy to install
- Applicable for floor and wall joint systems
- Approval/Listing according to UL or ETA
- Transitions available in horizontal and vertical layout
- High thermal insulation properties
- Free from asbestos and other harmful substances

MIGUA offers a variety of fire barriers, each tailormade for the specific requirements:

MIGUFIRE 2 HOUR UL Fire Barrier

Fire protection mat systems of varying thicknesses that are being mounted into the joint in accordance to the joint width. A blanket type fire barrier, tested and proven to provide a 2-hour fire resistant rating.

For Floor Covers

Expansion Joint Cover	Joint Width	Application
MIGUFIRE 1F	25 mm	Floor
MIGUFIRE 2F	50 mm	Floor
MIGUFIRE 3F	75 mm	Floor
MIGUFIRE 4F	100 mm	Floor
MIGUFIRE 5F	125 mm	Floor
MIGUFIRE 6F	150 mm	Floor
MIGUFIRE 7F	175 mm	Floor
MIGUFIRE 8F	200 mm	Floor
MIGUFIRE 9F	225 mm	Floor
MIGUFIRE 10F	250 mm	Floor
MIGUFIRE 11F	275 mm	Floor
MIGUFIRE 12F	300 mm	Floor

For Wall Covers

Expansion Joint Cover	Joint Width	Application
MIGUFIRE 1W	25 mm	Wall
MIGUFIRE 2W	50 mm	Wall
MIGUFIRE 3W	75 mm	Wall
MIGUFIRE 4W	100 mm	Wall
MIGUFIRE 5W	125 mm	Wall
MIGUFIRE 6W	150 mm	Wall
MIGUFIRE 7W	175 mm	Wall
MIGUFIRE 8W	200 mm	Wall
MIGUFIRE 9W	225 mm	Wall
MIGUFIRE 10W	250 mm	Wall
MIGUFIRE 11W	275 mm	Wall
MIGUFIRE 12W	300 mm	Wall

FIRE BARRIER | FOR ALL KINDS OF EXPANSION JOINTS

Fire protection systems able to absorb multi directional joint movements that additional swell in case of fire, thus offering fire protection and smoke tightness. Approved according to European standardization ETA 026; class EI120, class C-s1,d0* according to EN 13501-1.

How does it work?

The joint element is covered with aluminium foil with expansion fold at its narrow side. Thus, complete closing in the case of expansion of the joint is always given. In the event of fire, the intumescence material flattens and expands and supports MIGUFire in its insulation effect. Joint expansions of 20 mm are fireproof secured this way. Approved for joint widths of 20 to 100 mm with an additional expansion of 20 mm.

**Approved
according to
EN 13501-1**

For comprehensive information on these products, visit www.migua.ae or contact us at salesme@migua.com

Minimum wall or ceiling thickness (mm)	Starting joint width (mm)	Expanded joint width (mm)	Element length (mm)	Element width (mm)	Element height = Filling depth (mm)
